Subject: Rulemaking Petition RM 9419

Dear Sir;

I am an avid listener of KGE, but the distance that is involved in beaming the broadcast to my area makes it impossible to pick up the station early in the morning or later in the evening.

A positive response to KGE's request to use a fill in service would be greatly appreciated. Thank you.

Respectfully yours,

Subj: Rule Making Petition # RM9419

Dear Sirs:

I am delighted to hear there is a potential for low powered a.m. Stations to use fm. translators.

In our neck of the woods we have lots of territory but without much population. The possibility for am or fm local radio reception is limited. The low powered am station I listen to reaches as many listeners as it can get. Actually, they all do to stay in business. But this one in particular is desired by a lot of my friends who cannot pick it up because of interfering structures.

After dark we have to turn it off, too. But the use of fm translators would greatly enhance the reception of local am stations.

~~We are~~ There's a bunch of us who would sure be delighted for your favorable consideration on this Ruling. Lots much, Duane Pichl

Subject: Rulemaking Petition R M 9419

Dear Sir:

As we leave our small town in Eastern Montana, there is a sign at the city limits that says "82 Miles to next gas." This will help you to understand how remote some of our communities are here. Most towns in our area do not have their own AM or FM stations and we must rely on existing stations in other towns to cover our area. We get fairly adequate coverage in the daytime but the signal is lost or severely disrupted after sunset when the power is reduced. A fill-in service for a stand-alone low power AM station, such as KGLE, would help solve this problem and greatly benefit the listeners in our area.

There is limited FM reception in our area. RM 9419 would help increase the possibilities for local radio service. In addition, the format of KGLE is not available from any other local source in our immediate area. A positive response to RM 9419 could mean continuous service for our area.

Thank you, in advance, for your favorable consideration of this petition.

Respectfully yours,

Jeri Tromble

FEDERAL COMMUNICATIONS COMMISSION

Subject: Rulemaking Petition R M 9419

Dear Sir

I live in a rural community in Eastern Montana. As I am sure you are aware, this area is sparsely populated with many miles between many communities. We do not have our own radio station in Circle and must rely on stations in other towns. I enjoy listening to Station KGLE in Glendive, Montana during my daily routine. However, after sunset, (which is very early in the winter months) when the power is reduced, we can no longer receive KGLE. I miss it greatly during the evening hours, and many days family members would like to hear programs repeated that I was able to hear during daylight hours. But it is currently impossible.

Since there is limited FM reception in this area and a fill-in service for a stand-alone low power A M station would help restore this local service, RM 9419 would drastically increase the possibilities for this local radio service. It would also help "level the playing field" in the highly competitive area of radio.

Also, I enjoy Christian music and programs, and the only other Christian radio station that I am aware of nearby is in Billings, about five-hours' drive away. Many days I cannot receive it either--especially after dark. I am particularly interested in a chance to receive KGLE more hours in the day.

Thank you very much for your favorable consideration of petition R M 9419. This is a very important issue to those of us in rural areas.

Respectfully yours,

Marilyn K. Reinemer

Subject-Rulemaking Petition RM 9419

Dear Sir:

With great distances between towns in this area and with a small population base, local radio service in this area can be problematic. Most towns do not have their own AM or FM stations and must rely on existing stations in other towns. An AM station can cover the area fairly adequately in the daytime but for a large portion of the listening audience the signal is lost or severely disrupted after sunset when power is reduced. A fill-in service for a stand-alone low power AM station such as KGLE would help solve this problem and greatly benefit area listeners.

There is limited FM reception in the area. RM 9419 would help increase the possibilities for local radio service. Also the format of KGLE is not available from any other local source in our immediate area. A positive response to RM 9419 could mean continuous service for our area. I support RM 9419.

Thank you for your favorable consideration of this petition. Respectfully yours Otto Kaschube

Subject: Rulemaking Petition RM 9419

Dear Sir:

I am writing you to ask you to please give favorable support of RM 9419. Those of us who live in remote southeastern Montana depend a lot on radio stations like KGLE of Glendive MT for our weather forecasts, news and general listening enjoyment and informational programs. We live 120 miles from Glendive and when they cut their power when the sun goes down there goes our listening for the day. Therefore we would greatly appreciate it if KGLE could use an FM translator station as a fill-in service so we could receive radio information from KGLE after the sun goes down.

Thank you for your time and favorable consideration of Rulemaking Petition RM 9419.

Sincerely,

Subject: Rulemaking Petition R M 9419

Dear Sir,

We live in rural Eastern Montana on a ranch twenty miles from town. There is no am radio station in our location and we depend on KGLE for news and weather reports.

We can pick up KGLE in daylight hours but as the sun goes down or before it comes up the signal is so distorted that we cannot tune in and receive a broadcast.

We would like to express our support for RM9419 making broadcasts available to us in our rural area. We know that there is a great deal of competition for air time with all the new communication devices available. This fill-in service for a stand-alone low power AM station would help.

KGLE has the only format of their kind in our listening area and we would be delighted to be able to receive broadcast before and after daylight hours. Thank you for considering this matter in a favorable way.

Yours truly,

Jackie Steinbeisser

Subject: Rulemaking Petition RM 9419

Dear Sir:

I listen to KGLE as I drive in my truck during the day but after sunset, the signal is lost or severely disrupted when the power is reduced. A fill-in service would help solve this problem for stand-alone lowpower Am station such as KGLE and I would be able to continue to listen while I'm trucking into the evening.

There are not many FM stations available in this rural area of Montana and it is pleasant to have a local broadcasting station on the air. RM 9419 would help increase this possibility. There are no other local sources in our immediate area. A positive response to RM 9419 could mean continuous service to our area.

RECEIVED

JAN 15 1999

FCC MAIL ROOM

Dear Sir,

I enjoy listening to KGLE but due to poor reception because of lost or severely disrupted service after sunset when power is reduced, I am unable to get a station of my choice. A fill-in service for a stand alone low power AM station such as KGLE would help solve this problem.

There is limited FM reception in this area. RM 9419 would help increase the possibilities for a local broadcasting station to continue to be heard in the evening hours.

I appreciate your time in considering this petition.

Respectfully yours
M. Why.
